

GUI_Reminder – Reminder Management

Revision history

2017-03-22	Robin Lamacraft	Original draft
2023-07-15	Don Ferguson	Align with Build 30

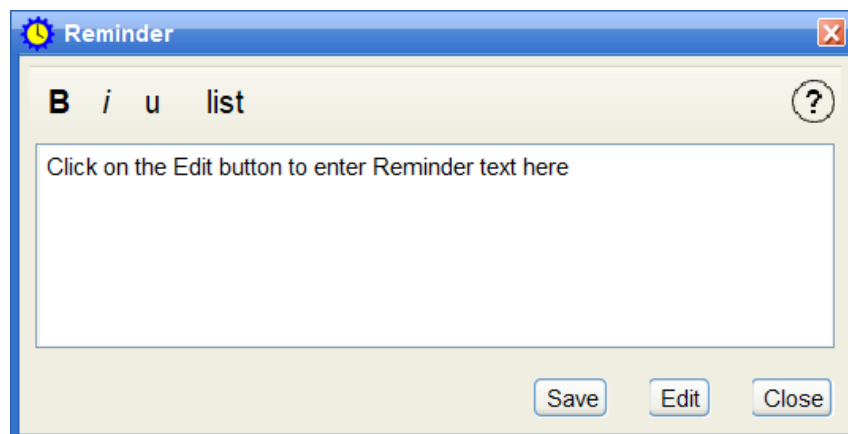

SCOPE

This GUI module displays a window of a reminder message to the user of HRE. It also allows the user to create or edit relevant reminder. This is a floating window that the user can position. It will be automatically closed when the parent screen from which it was opened is closed.

LOOK AND FEEL

The contents of the Reminder screen:

1. A scrollable resizable text region that displays the Reminder text
2. When no Reminder has previously been set; a default message is displayed requesting the user to click on the Edit button enter text
3. Clicking the “Edit” command button opens the text area for editing and provides basic formatting controls
4. Clicking the “Save” and/or “Close” buttons perform the appropriate action.
