

GUI_EditEvent – Event Edit

Revision history

2017-03-19	Robin Lamacraft	Original draft
2018-06-01	Rod Thompson	Amend Required Services 3
2022-04-11	Don Ferguson	Revise and align with Build 27 draft window
2023-07-19	Don Ferguson	Align with Build 30

SCOPE

This GUI module displays the list of properties of a chosen Event for editing, copying or deletion.

LOOK AND FEEL

The frame has 10 sections:

- Tool bar:
 - “Reminder” to open and save a Reminder text box
 - “Help” to open the Help for this window.
- Event Type section:
 - Event Type button – clicking this button displays a list of all Event types and allows changing this Event’s type
 - Display of the Name of the Event type.
- Add Media section:
 - Contains 4 buttons which allow for the addition of Image, Text, Audio, Video external files to the Event.
- Date section:
 - Contains 2 entry areas for defining the Date and/or Sort Date of the Event. Any entry in the Date field is automatically copied to the Sort Date field.
- Associated People section:
 - An “Add a Person” button which allows the selection of people to be added to this event (and selection of their Role)
 - A table of the Persons and their Roles in this event. Selecting a person allows for editing their role or deleting them from the Event.
- Style section:
 - Drop-down box allows selection of the Name or Location style applying to this Event
 - A table displays the current Location or Name style fields and their values.
- Memo section:
 - Contains the editable contents of any memo for this Event.
- Citation section:
 - Contains a table of Citations applying to this Event.
- Sentence section:
 - Contains the default sentence structure applying to this Event type, for the currently selected person in the ‘Associated People’ table. Editing of the sentence data creates a local sentence that applies ONLY to this Event.
- Controls:
 - “Cancel” to exit the screen without saving
 - “Save” to save any changes.
